

Examples

Ask your child how THEY would work these out...

1= Red, 2= Brown, 3=Blue, 4=Green, 5=Purple,
6=Yellow, 7=Orange, 8=Grey, 9=Light blue, 10=White

We hope that this has helped.

If you would like to know more please ask your child's
teacher for our other publications.

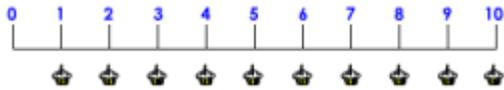

Helping your child with Maths

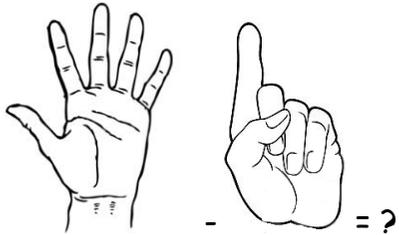

Subtraction

$$7 - 5 = 2$$

What does this look like?

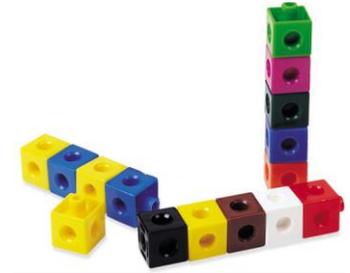

10 - 5 = ?

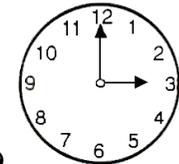

How can I help?

Q: How many will I have left if I subtract 4?

Q: How much have I saved by buying this in the sale?

Sale
<small>WAS</small>
£10.00
<small>NOW</small>
£5.50

Q: What time was it an hour ago?

What are they being taught?

"We work things out in our heads first."

"We choose from different methods to work things out."

"We write it down in a way that makes sense to us."
